Only on the first level and couldn't do it due to my room being too small. I really hope they add a teleport feature for those of us without massive rooms. Despite this what I played was really fun and I would recommend it to anyone who likes some puzzles.

P.S. Please release a teleport even if it's optional so as to not ruin the experience for people with bigger rooms :)

. Best escape room game so far. Nice and clean graphics, good controls. Make sure you have a bigger room scale than the minimum, 1st room is ok but in the second one you need about 2,5m x 3m space. Cleared the 2nd room ok, very solid experience and fun to solve. 1st didn't start off too well, have to give it a new try. Waiting for new rooms on this one!. It's unfinished, but there is a lot of potential here. This VR game is like the job simulator of room escapes, at least it tries to mimic a job simulator in terms of the style of art and its lightheartedness. However, there is no story (which isn't the end of the world considering it's a room escape), and there are currently only 2 very short escape rooms (hopefully more are coming). My personal opinion is that people should take a wait and see approach. It's kind of an interesting demo at the moment, but if the developers add more content then I think it is a definite buy.. The Puzzle Room is another one of the good ones, and judging from the menu there's more coming in addition to the two rooms the game already has. There's a lot of things to play with, hats to wear, things to paint on, and puzzles to solve, and that makes this one feel unique; not everything in these rooms are related to the puzzles, some things are just there to let you wind down and spray paint the walls or put on a Vader helmet and swing around a lightsaber for the fun of it. The second room may or may not have a problem because one of the keys on the computer's keyboard doesn't work for me that may be required for the answer, but otherwise this is a firm contender for "one of the good ones" in the Escape Room VR category.. This game was freaking awesome if you like puzzle games ... Though it only took me 2.1 hours (as per steam) to complete the first 3 levels it was totally worth the \$10 I spent on it.

To the developers I hope you come out with a ton more new levels that only get exceedingly harder...I would even be willing to pay for DLC's or expansion packs if that is any encouragement to make the new levels.

The Puzzle Room has a lot of different cool things, including a surprise Johnny Five, i'll list the pros and cons for the current version:

Pros:

- * A lot of puzzles, you need to think here, and is very challenging
- * Johnny Five
- * You can change your hairstyle and see yourself in reflections.
- * Two rooms you can play in.
- * Spray Paint
- * Playable Records.

Cons:

- * Sadly the game crashes a lot, not sure why..
- * First puzzle was not completable in one segment as the flashlight would not work in the secret section, had to restart game.
- * You can't fully assemble Johnny five (No Disassemble :())
- * A little expensive for how buggy it is right now.

Overall I believe this game has potential but I would wait until the bugs are fixed or it's on sale.. This game was freaking awesome if you like puzzle games ... Though it only took me 2.1 hours (as per steam) to complete the first 3 levels it was totally worth the \$10 I spent on it.

To the developers I hope you come out with a ton more new levels that only get exceedingly harder...I would even be willing to pay for DLC's V expansion packs if that is any encouragement to make the new levels.

. Third room still to go but definetly worth the money. One small con is that items may be lost for good some times. Had to restart the first room once because of that.. I need more rooms. The puzzle room VR is a very simple yet puzzling game. It puts you in a room where you are trapped yet you have freedom to interact with almost everyth single aspect of that room. The game at its current state is not to hard, but if you are one to mess around in vr you can easily waste time in this game and still have fun. Currently it only has 2 rooms to escape from. The first room being short and easy yet still fun. While the second room feels the developers put more time into it to make it a little longer. Both rooms are still fun and possible to complete. If you are looking for an escape the room for a decent price and future updates the price on this game is pretty resonable. Id reccomend this game to anyone looking to escape a room or two, and definitely reccomend throwing some friends into the game aswell.. I wish i was smarter... Just so i could feel the joy of completing one of these puzzles, with no effort!

This is one of those games.... I need to really take some time with.

I can't give much in terms of a review, but i had fun!

I'm going to share this around and see who can help me work out these puzzles :D

Still enjoyed this game a lot! some good puzzle's where u actually have to think a little to move on. Only 2 lvl's right now, but looking rly good!. I will write a full review once teleportation is added and height adjustment is added. As someone who is extremely short and has a small room, this is unplayable for the time being. Sucks because its a great game otherwise.. Its a nice puzzle game for its price, more then one room, thank god, but I hate to be this guy, my rooms super small, and I hate geting refunds on good games. Just add a teleport function please
